I.
Sources

II.
Extraction

III.
Staging

IV.
Design

V.
Distribution

VI.
Visualization

The Idea

Step 1

Connect Peakboard

Connect the Peakboard-Box to your screen of any size - no matter if it is a 7-inch-display or a huge arena screen. The data connectivity will happen through wire or WiFi.
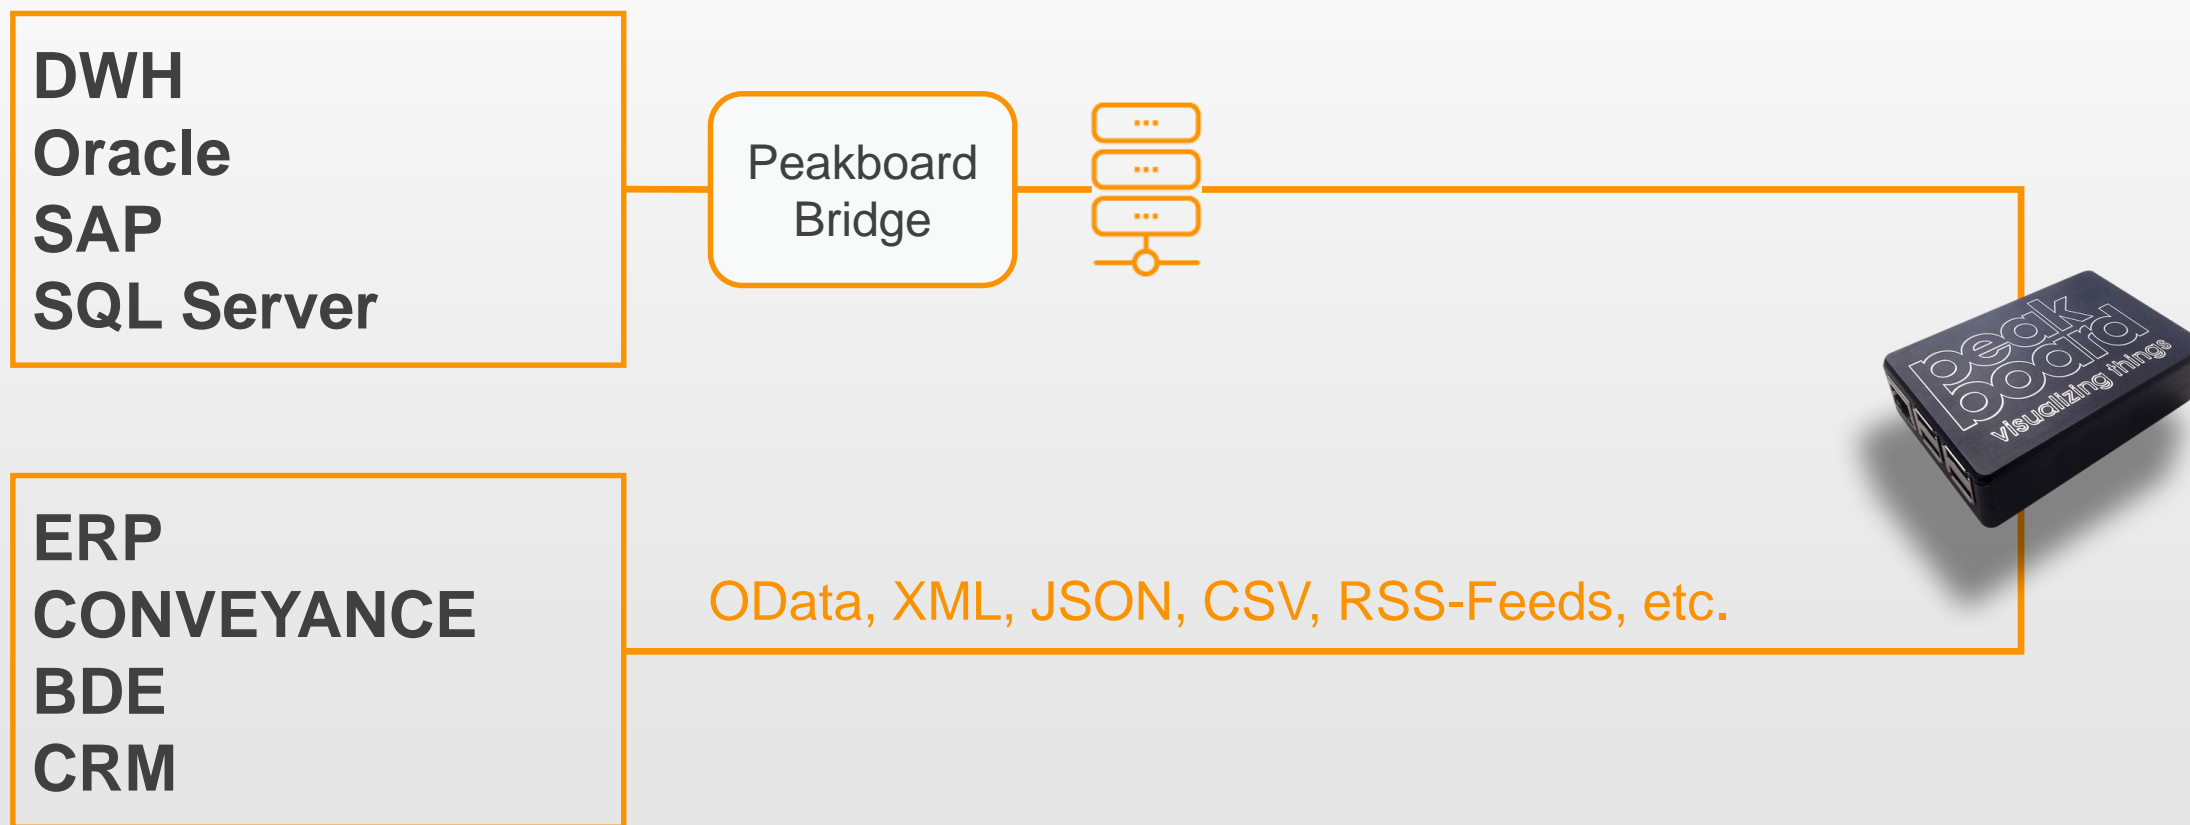

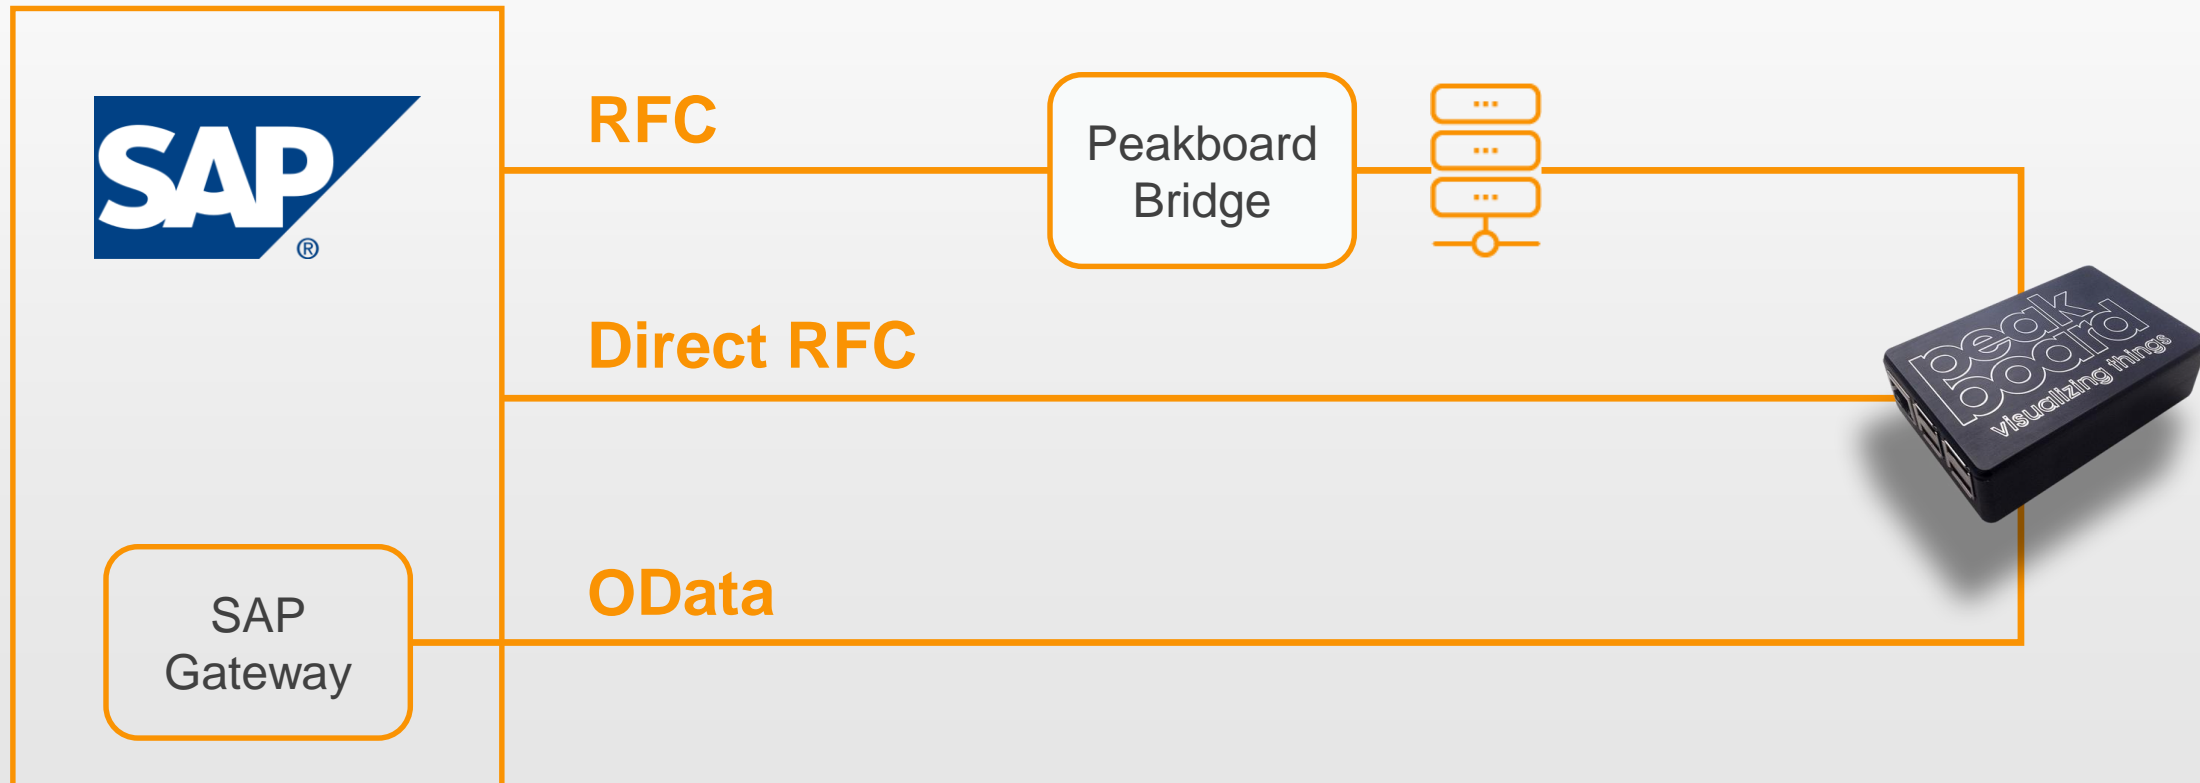

Step 2

Peakboard-Designer on your Desktop

Launch the Peakboard-Designer and build beautiful and dynamic visualizations, which will be connected directly to your inventory management, Social Media, or any other source system.

Step 3

Deploy Visualization on the Peakboard-Box

Deploy your design in one go on the Peakboard-Box with everything that comes with that - images, videos, data sources, charts, and logic.

Step 4

Visualization of your Peakboard

See how Peakboard plays your completed visualization on the screen, how it will impress customers, inform employees, and optimize processes - without the need of a central server or cloud component - completeley self-sufficient.

Pricing

Peakboard Pro   **990 EUR**

incl. 1 x hardware and license   Net

Peakboard Enterprise   **1990 EUR**

incl. ERP Connectivity, e.g. SAP   Net

Service und Support   **20 %**

incl. hardware   Net
